

# Working Method AIRMOUNTING-MODULE

## Single AIR-Mounting-Tool

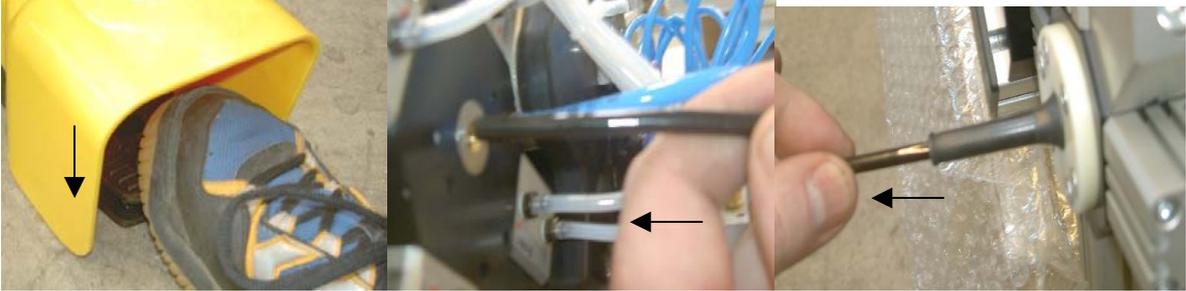

Step 1: Close the module by hand

Step 2: Put the grommet in the module

Step 3: Press footswith and push the cable through the module and the grommet

Step 4: Is the cable on the correct position, stop pressing footswith and the module are opening

If you want to change the grommet position, you must adjust the cableholder at another position
